

Additional Items Required by States for Nursing Home MDS 3.0 Assessments

(09/10/2010)

States can require additional CMS defined items on their Quarterly (NQ) or PPS (NP) assessments.

The following states have been approved to collect all CMS defined items except for G0900A, G0900B, and all Section V items on the item subsets (ISCs) listed below:

State	Quarterly - NQ	PPS - NP
Connecticut	Yes	Yes
South Dakota	Yes	No
Washington	Yes	No
Illinois	Yes	No

Please note: This is a change to the items on the state's OBRA quarterly (NQ) and/or PPS (NP) records. It is not a different type of comprehensive (NC) assessment. These items must be sent in on the NQ or NP assessments. If providers send in an NC that is missing any comprehensive items, such as the Section V items, it will be rejected. CMS does not create state specific printable item subsets.
